

Summer 2009 – ACT and SAT Prep

"Ivy Insiders' mission is to harness the insights of college students who succeeded in the testing and admissions processes to help current high school students do the same. Since 2003, our classroom programs, private tutors, and free summer SAT workshops have helped thousands of students improve their test scores and maximize their college admissions success. Our SAT classroom and tutoring programs, in particular, deliver higher score improvements than any other course on the market -- over 250 points on average for the SAT and 4 points for the ACT.

"High test scores are important not only for admissions to highly selective schools, but for scholarships and other academic awards. This class will teach students the standardized tests are predictable and beatable. This summer, the class is being offered at TA for \$699. If parents contact Catherine Cook at catherine_cook@ivyinsiders.com before June 1st, they can also receive a discount code for up to \$200. If students aren't satisfied with their scores after a class in June, they can take another class in July for free. At-home tutoring is also available and can be signed up for at ivyinsiders.com.

"A Free Workshop and Practice Test will be given June 10th. This, classes, and tutoring can be registered for at ivyinsiders.com. In the workshop, students and parents will be given advice on ways to study for the SAT and afterward they can stay and take a free diagnosis exam. Even if students can't commit to a full ACT or SAT class, the strategies they will be given in this free workshop should be very helpful to them on their tests."
