

Banned Software List

Bonzai Buddy (Uses computer's resources, software conflicts) -- this sometimes downloads from Web sites you visit - please read the fine print and DO NOT allow this to download

Comet Cursor (Spyware, uses computer's resources, software conflicts)

Web Shots (Spyware, slows boot time and system operation, software conflicts, and corruption of the registry)

Gator (Spyware, suspected software conflicts)

Weatherbug (High bandwidth use, slows boot time, can disable printing, spyware)

AOL version 7.0 or lower. Version 8.0 or higher are acceptable and are a free download from AOL so if you have version 7.0 or lower, please upgrade your software. (Software conflicts, network issues, reduced screen size, sometimes disables mouse, and corruption of the registry)

Post It Notes – This software slows the computer down and causes lockups. Use the reminder or task list functions in Outlook instead.

All music/video download software (copyright infringement, high bandwidth use, software conflicts, and corruption of the registry)

* Pay as You Go Services are exempted (iTunes, Napster, Rhapsody, etc)
